PROFESSIONAL SUMMARY

Full-Stack Engineer and AI Specialist with 2+ years of hands-on experience designing and building scalable web applications, SaaS platforms, and AI-powered systems. Proficient in the full JavaScript/TypeScript ecosystem — React, Next.js, Node.js — with deep expertise in LLM integrations, RAG pipelines, and intelligent automation. Passionate about helping founders and startups transform early-stage ideas into production-ready, scalable digital products built on strong architecture.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Redux, Tailwind CSS, Bootstrap, Material UI, Axios

Backend: Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, GraphQL, Supabase, Redis, JWT Auth, OAuth

AI & Automation: LLM API Integration (OpenAI, Claude, Groq), LangChain, RAG Pipelines, AI Agents, Vector Databases, n8n, Zapier

DevOps & Cloud: Docker, AWS, Vercel, CI/CD, Git, GitHub, Postman, npm

CMS: WordPress, WooCommerce, Custom Modules, Performance Optimization

Other: MS Office Suite, Typing 50+ WPM, Figma (basic prototyping), Team collaboration

PROJECTS

CodebaseAI — AI-Powered GitHub Repository Analysis Platform | Next.js · TypeScript · Supabase · Groq · HuggingFace · RAG Pipelines

Live: <https://codebaseai.vercel.app>

- Built a full-stack AI platform that analyzes GitHub repositories to generate architecture summaries, system diagrams, and tech stack breakdowns, along with an interactive AI chatbot with persistent chat history and memory for querying code behavior in natural language (e.g., 'How does authentication work?').
- Implemented a RAG pipeline using HuggingFace embeddings and Groq LLM, enabling semantic search and context-aware answers across large codebases.
- Integrated Mermaid.js to generate architecture and system flow diagrams from repository analysis, along with a Supabase-based caching system to store previously analyzed repos and reduce redundant processing for faster load times.

SnapSend — Encrypted File Sharing SaaS Application | Next.js · TypeScript · Supabase · Clerk · Resend · PostgreSQL

Live: <https://snapsends.vercel.app>

- Built SaaS file-sharing application that enables users to upload, store, and share any file type via a secure, shareable link.
- Implemented end-to-end encryption, password-protected file sharing, and direct email delivery of file links using the Resend API.
- Built private user dashboards with Clerk Auth for secure file management, access control, and one-click file downloads.
- Architected the backend with Supabase and PostgreSQL, optimizing storage queries and access policies for scalable, multi-user file management.

WORK EXPERIENCE

Accounts Assistant & Bookkeeper · Ghwakhe Steakhouse, Peshawar

Aug 2023 – Feb 2026

- Managed daily cash transactions and accurately recorded all sales and expenses in registers and ledgers.
- Maintained organized financial records including categorized bills, receipts, and expense reports.
- Assisted with bookkeeping entries, account reconciliation, and end-of-month reporting.
- Managed petty cash, invoices, and vendor payment tracking during peak-hour cashier duties.

EDUCATION

Bachelor of Science in Computer Science

CGPA: 3.5 / 4.0

Shaikh Zayed Islamic Centre, University of Peshawar | 2023 – Present

CERTIFICATIONS

Diploma in Information Technology (DIT)

2023 – 2024

Board of Technical Education, Peshawar
